one who yearns to maintain a fulfilling relationship with those who have dementia.”

Communication is more than just talking and listening. It’s also about sending and receiving messages through attitude, tone of voice, facial expressions, and body language. As people with dementia progress in their journey and the ability to use words is lost, families need new ways to connect. Ms. Snow will teach you how to effectively connect and communicate with someone who has dementia at every stage of the disease. Her enlightening, witty, entertaining, and energetic style will educate, inspire, and motivate.
